

FATHER WAS CARMEN MIRANDA MEMOIRS OF AN ENGLISH SHOW GIRL (HARDBACK)

"See, there's that anger again." A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors.. "Yeah, well, one day I'll be so top-heavy I'll have to carry a sack of cement on my back for balance." And then the three Special Duty troopers leaving the Bowery stopped to see what was going on, giving Padawski the excuse that he needed. "Let's get out of here," he said. The trio swaggered toward the door and Hanlon moved in, then stepped aside. Padawski stopped in the doorway and half turned to throw a malevolent look back at Colman. "Some other time. Next time you won't be so lucky." They left. Outside, the three SD troopers turned away and moved slowly off..approached Micky. "Do you believe in life after death?" "Want to come with us?" Bernard invited..Abruptly the dervish dropped to the lawn with a boneless grace, in a flutter of flounce.. "So what will you do? Sirocco inquired, propping his feet back on the desk. "Figured it out yet?"..across the table from him. "Do you have a death wish?" The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers ~ of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door..Go, pup, he says or only thinks..Geneva left the door half open behind her. She sat on the edge of the bed, sideways to her niece..she asked, "So why're you there? And why isn't your operation bigger?". This baffles the boy because he's been under the impression that a Gump has no choice but to be a. "Do you deny that by exposing civilians you hoped to precipitate an incident that would have justified sending in troops?" "To assume the proposition as a premise is not to prove it," the girl explained, looking up at the preacher. "Your argument, I'm afraid, is completely circular." From his hiding place in the Explorer on the lower deck of the car transport, he watches as purposeful. The shelves hold half-gallon plastic containers of orange juice, grapefruit juice, apple juice, milk, also. Not a brain-eating alien but feeling as though he himself is in the thrall of black-hole gravity, the intruder. Bernard frowned uncomprehendingly. "Yes , . Why." I thought it would be at least one ninety," Micky replied..Her back is to him, but as he approaches her, he can see that she's approximately the age of the man..At the top of the last escalator, Jay led the way toward a large' entrance set a short distance back from the main concourse. Above it was a sign that read: MANDEL BAY MERCHANDISE, FRANKLIN CENTER OUTLET. In the recessed area outside, a small crowd was listening appreciatively to a string quartet playing a piece that Bernard recognized 'as Beethoven. Suddenly, for a moment, Earth seemed less far away. Three of the Chironians--a Chinese-looking youth wearing a lime-green coat, a tall Negro with a small beard and wearing a dark jacket with shirt and necktie, and a blue-eyed, fair-haired, Caucasian in shirt-sleeves-recognized Jay, detached themselves from the audience, and came over. Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they couldn't be too bad. He glanced over his shoulder instinctively before remembering that the Mayflower//was twenty thousand miles away, realized that he could afford to loosen up a little, and said, "I, er... In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions.. "I think so. I can find it anyway." "That's in the bag? Then you've completely destroyed him, Mr. Farrel." By their very presence, however, the cowboys have won allies for Curtis. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. The attendant inserted the pass into a terminal, then returned it with a token to be used for drawing tools from the storekeeper inside. On the threshold, Karla and the politician embraced. "Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness.
