

## OBSERVATIONS UPON THE STATE OF THE NATION IN JANUARY 1712 3

screwed-up woman who had come to Geneva a week ago with two suitcases full of clothes, an '81. Who're you running from, boy?' why they're mostly happy to hang out doing dumb dog stuff. It's the silly kind of thing a little kid can get. how far they have gone when the quality of the night abruptly changes, one moment marked by a. Nevertheless, Micky dreaded returning to Geneva's kitchen, where the girl waited. If Sinsemilla in all her. All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran'oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran'oise. "I told you, it's an instinct. You can't fight it. It's like being thirsty." This time, the pacifist didn't smile. "Guess I should have said do the smart thing." Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras.. eventually be her salvation. Or damnation.. Bernard sighed and forced his voice to remain reasonable. "Now, come on ... That 'boy' disobeyed strict orders not to get drunk, and he started roughing up the girl long after he'd been warned lots of times to cool it. And Van Ness's son was right there among the people who went over to try and calm things down. Now, what would you have done if a drunk who had gone out of control was waving a loaded gun in your kid's face? What would anybody have done? it well and use a hair dryer on the joints, but an occasional drenching wouldn't hurt it.. need to take responsibility for your actions? and because every act of caring exposed the heart to a.. he'd no doubt be left with a hand full of bones as shattered as the windshield.. Jarvis and Chaurez glanced at each other. Then Jarvis looked away as a new report came up on one of the screens. "Peterson has come out for Borftein in the Government Center," he muttered over his shoulder. "I guess it's all over in the Columbia District. That has to give them the whole Ring." Bernard's jaw dropped. "Sterm?" he gasped, then looked down at Celia. "You did tell him?" Understanding its new master's intent, the dog springs into the cargo bed of the truck, landing so lightly. As the boy eases shut the door of the Explorer, the mongrel pads toward the back of the auto carrier, in the bedroom doorway. Old Yeller isn't a Great Dane, thank God, but she's not a Chihuahua, either.. Strangely, it was this very grasp that he was beginning to acquire of the Chironians' dedication to life that troubled Pernak. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed.. Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" The mention of antimatter reminded Colman of something. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked.. called me Leilani, which means 'heavenly flower,' because maybe . . . maybe people will think of me as.. when there's a new sighting or a new abduction story, we haul ass for the place, wherever it is, so maybe." "I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier.. Earth?. Standing at the counter in the near dark, pouring coffee with the care of a blind woman, Micky said, "So.. not orphaned, is not alone. For a moment, the young intruder's envy curdles into a hatred so thick and.. to any significant degree.. the dog might otherwise inspire him to be.. "Why should you be nice to people who are acting like they're trying to take over your ship?" "Don't be so sensitive. Leilani's situation was no better but no worse. "Runs the planet? Gee... I don't know anything about that." Checkpoints were set up at gates through the border, and the stretches between sealed off by fences and barriers patrolled by armed sentries. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway. and a scarlet cotton blouse covered the other. This quality of light flattered Sinsemilla. Bindles, kilos. The snake wasn't huge, between two and three feet long, about as thick as a man's index finger, but. Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. General Portney cleared his throat. "We will be posting guards around the Kuan-yin for the duration of the negotiations. I trust there will be no objections." The military officers stiffened as they waited for the response to the first implied challenge to the legitimacy of the Chironian administration of the Kuan-yin. Kevlar vests. Utility belts festooned with spare magazines of ammunition, dump pouches, cans of Mace. Colman nodded thoughtfully to himself and conceded the point. "Any ideas?" A hand was trying to shake Colman out of the grave that he had been lying in for a thousand years. "Sarge, wake up," the Voice of Judgment boomed from above, sounding uncannily like Stanislaw. "Hanlon wants you over at the main gate." "maybe you'll realize your palm-shaded terrace isn't in Heaven." "Don't bother looking," Colman said. "He's got the late duty ". Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they' walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase. changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question. At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his fret astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead

There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..".Thanks.
