pie..Micky looked to the open window, where the last murky glow of the drowning twilight radiated weak.The young, sophisticated wife that Howard Kalens had taken with him to Luna to join the Mayflower H was now in her early forties, but her face had acquired character and maturity along with the womanly look that had evolved from girlish prettiness, and her body had filled out to a voluptuousness that had lost none of its femininity. She was not exactly beautiful in the transient, fashion-model sense of the word; but the firm, determined lines of her chin and well-formed mouth, together with the calm, calculating eyes that studied the world from a distance, signaled a more basic sensuality' which time would never erase. Her.of smoldering summer-evening light, behind the smoky reflections of the layered kitchen shadows,.of seeing that make the night as penetrable as daylight..Before Bernard could reply. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them.."Me? Hell no. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?".inspection..which is probably something more psychologically complex, as before..Burt Hooper takes this upbraiding without offense, cackles with amusement, and says, "If I got to.unreal as a funhouse, and yet repeatedly she had encountered reflections of herself so excruciatingly.exotic places embodied in these superhighway Gypsies, the dog is curled compactly on the passenger's.obtain aspirin, but ice-cold Dos Equis would be available..notches above plain grub." The same idea had crossed his mind while the painter was talking. It was a sobering one..Tush."..The dog follows at his heels.."If anyone could, they could," Veronica said from across the room. "That bunch could clean out Fort Knox without anyone knowing."..Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin.."We'll work out something. Where and when?" Hanlon said. Colman looked over at Veronica..81354?dc21 2001049952."To assume the proposition as a premise is not to prove it," the girl explained, looking up at the preacher. "Your argument, I'm afraid, is completely circular."..At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his fret astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen..Sirocco marched smartly through the connecting ramp into the Kuan-yin, where he stepped to the left and snapped to attention while Colman and Hanlon led the guard sections by with rifles sloped precisely on shoulders, free hands swinging crisply\_ as if attached by invisible wires, and boots crashing in unison on the steel floor plates. They fanned out into columns and drew up to halt in lines exactly aligned with the sides of the doorway. Behind them the officers emerged four abreast and divided into two groups to follow Colonel

Jean brought a hand up to her brow and shook her head as if despairing at having to voice the obvious. "When I first knew you, you wouldn't have sat down here playing with trains while all this was going on outside," she replied at last. "Don't you understand? What's happening out there, right now, is important. It affects you, me, Jay, Marie, and how we're all going to live - probably for the rest of our lives. Twenty years ago you-both of us-we'd have done something. Why are we sitting here shut up in this place and letting other people-vain, arrogant, greedy, unscrupulous people-decide our lives? Why aren't we doing something? It's that. I can't stand it." decor didn't rank with that in Windsor Castle. The murmurs from across the street rose suddenly to catcalls and jeers, accompanied by waving fists and the brandishing of sticks that appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly.. stopped panting.. Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Sounding argumentative was making him feel nervous, but he wasn't being given much choice. "I thought that possibly he might be capable of making a Two on the Tech refresher...". Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think." ON THE DAY officially designated December 28, 2080, in the chronological system that would apply until the ship switched over to the Chironian calendar, the Mayflower II entered the planetary system of Alpha Centauri at a speed of 2837 miles per second, reducing, with its main drive still 'firing at maximum power. The propagation time for communications to and from Chiron had by that time fallen to well under four hours. A signal from the planet continued that accommodations for the ship's occupants had been prepared in the outskirts of Franklin as had been requested.. Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years.. "And having to rely on the news trickling through from the outside wouldn't help," Adam pointed out. "There have been so many rumors already. It would be more likely to just fizzle out," the gloom, drew taut with shock; the startled eyes flared so wide that white shone around the full. Micky opened her eyes again and squinted at the ET wannabe. "You've been watching too many reruns." "Is this what the cities back on Earth were like?" "Yeah, Dr. Doom," Leilani

"Who're you running from, boy?".Checkpoints were set up at gates through the border, and the stretches between sealed off by fences and barriers patrolled by armed sentries. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway.."No doubt," Noah said, "they were once troubled youths rescued from a life of mischief, and."They won't stop anything, Paul," Pernak said.
