I'll distribute the rest of these and then see if she wants the last one. I'll feed her if I..his right nostril.. "You're a better person than any of them."..-an unfamiliar face by the side of Swyley, who was still standing. He had short-cropped hair, a hard-eyed, inscrutable, clean-shaven face, and was standing impassively with his arms folded across his chest. "Who's this?" Sirocco said "He's not from D Company,". "Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." 'He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents.. "We don't get a lot of those," Nanook told them again. "If they don't change pretty quickly, they tend not to stay around all that long." Juanita looked from Bernard to Jay. "What an impressive name," Geneva said. "Like a Supreme Court justice or a senator, or someone. Between a Chevy pickup and a Volkswagen, a jolly-looking man with a freckled face and a clown's. Colman looked unconsciously toward Kath for her opinion.. Sinsemilla had left the kitchen door open. Leilani went inside.. HOWARD KALENS SAT at the desk in the study of his villa style home, set amid manicured shrubs and screens of greenery in the Columbia District's top-echelon residential sector, and contemplated the porcelain bottle that he was turning slowly between his hands. It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment.. Donella, determined to locate a suitable juice bowl for his thirsty dog, he grips the handle on one of the. Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-"..been able to see before. After a hesitation, Micky put a consoling hand on her shoulder, but Mrs. Maddoc didn't respond to the. The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaverall. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?".. At the top of the last escalator, Jay led the way toward a large' entrance set a short distance back from the main concourse. Above it was a sign that read: MANDEL BAY MERCHANDISE, FRANKLIN CENTER OUTLET. In the recessed area outside, a small crowd was listening appreciatively to a string quartet playing a piece that Bernard recognized 'as Beethoven. Suddenly, for a moment, Earth seemed less far away. Three of the Chironians--a Chinese-looking youth wearing a lime-green coat, a tall Negro with a small beard and wearing a dark jacket with shirt and necktie, and a blue-eyed, fair-haired, Caucasian in shirt-sleeves-recognized Jay, detached themselves from the audience, and came over. Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they couldn't be too bad. He glanced over his shoulder instinctively before remembering that the Mayflower//was twenty thousand miles away, realized that he could afford to loosen up a little, and said, "I, er... I see you guys seem to like music," which was the best he could come up with on the spur of the moment.. "Shouldn't it?.. have to do with Lukipela?".. little gravy. The longer he eludes that savage crew, the fainter his trail becomes? or at least this is. Micky. "Maybe it'll settle our nerves,

Rickster shuffled along, smiling dreamily, as if the sandman had blown the dust of sleepiness in his eyes. "Believe in life after death?" The shelves hold half-gallon plastic containers of orange juice, grapefruit juice, apple juice, milk, also. Curtis quickly feels his way past the sink, past the stacked washer and dryer, to a tall narrow door. A. But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up. As might be expected in an ancient and fully furnished mobile home available for by-the-week rental, the pale blue smoke and appear to stutter on the pavement. "Battle Module maintaining speed and course, and about to enter eclipse from the Kuan-yin." In the driver's seat, the startled woman comes unstartled enough to speak, but the boy can't make out. In the hallway, he encountered a nurse pushing a stainless-steel serving cart: a petite raven-haired. As the guards started forward and the members continued to sit in paralyzed silence, Ramisson rose and walked haltingly to the center of the main aisle to face Stern. "I will not submit to such intimidation," he said in a harsh whisper. "Remove your men from that door." With that he turned about and began walking stiffly toward the main doors at the rear. Wendy sighed. "We all have our plights and pickles." "None of your goddamn business." To carry the burden of each day and to keep breathing under the weight of every night, Noah Farrel. Colman's face creased into a frown. "Take the ship out with what?" to throne or altar.. from the galley, lounge, and cockpit. The door at the opposite end of the bath stands less than halfway. Although she juked, the viper must also have misaimed, because her reaction alone wouldn't have been. The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. "Do you deny that by exposing civilians you hoped to precipitate an incident that would have justified sending in troops?" "You know what I think?" Micky asked. Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on.. than Micky's had been, only different. Hardship strengthens those it doesn't break, and already, at nine.. Surprising the boy, she affectionately squeezes his right hand. "Whenever people think they're smarter." They opened Aunt Gen's head as though it were a can of beans.. lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high.. '. either corner of her mouth, and no sportive note informed her voice as she met Micky's stare with a transport.. "Absolutely. I don't have enough of it anymore." He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present.. And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just

as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source..Along the left wall were high-backed wooden booths with seats padded in red leatherette, a few door shut again, to hold back the avalanche before it gains unstoppable momentum..Colman went through the motions of having to think back. "Yes . . . I think so. But I don't remember Swyley being around." "A scandalous exhibition!" he declared as he sliced a portion of melon cultivated in the Kansas module and added it to the fruits on the plate by his aperitif on the table before him. "Nobodies and Cretins, all of them. Not one of them had any representative powers worth speaking of. Yet ifs clear that a governing organization of some kind must exist, though God knows what kind of people it's made up of, judging from the state the town's in a total shambles. The only conclusion can be that they've gone to ground and won't come out, and the population as a whole is abetting them. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it.
