Gestapos, they slam through the swinging door, their boot heels clapping hard against the tile floor.. The sergeant hesitated for a moment longer, and then ~- nodded to the two guards. Borftein and his party marched through, and Hanlon began posting men to secure the entrance, another section of D Company materialized from a stairwell to one side of the foyer and vanished into the Communications Center, taking with them a few bewildered secretaries and office workers that they had bumped into on the way.. self and taking in the two gifts as he drew to a halt. "Very cosy," Sirocco agreed.. "My birthday was February twenty-eighth. That was Ash Wednesday this year. Do you believe in fasting. the motor home is in the shop for an overhaul, and Dr. Doom won't stay in a hotel or motel because he. Leilani didn't suggest that an Egyptian queen who had reigned more than two thousand years ago. Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." The August heat. The breathless dark. The far-bound traffic on the freeway. Leilani under her mother's. "No doubt," Noah said, "they were once troubled youths rescued from a life of mischief, and." Ah, well, it's not over yet," Hanlon said. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base-just before midnight, it was, when we were about to be relieved." CHAPTER THREE. The apparition in the dark yard next door stopped squealing, but in a silence as disconcerting as the cries. impact predicted for noon Friday.. "I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit." .discover that these behemoths were hosting a World Wrestling Federation beer party in his bungalow.. The bulkhead door at the far end of the catwalk was open, and some tools were lying in front of an opened switchbox nearby. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the fight angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals..and then even more solid, a whoosh and a thump combined, as a blade might sound if it could slice off. Driscoll met her eyes calmly. "I'd risk it," he said. "Sure, if this was for real, I'd put money on it." Sterm shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve." Curtis still must find a bowl for the orange juice, but he's not going to look in any more nightstand. He returned the squeeze reassuringly. "You'd better believe it?". After he relieves himself, us lie's washing his hands with enough liquid soap to fill the sink with glittering. Kath turned back from the night table, sat up to sip some of the wine, then passed him the glass and snuggled back inside his arm. "I suppose we must seem very strange to you, Steve, being descended from machines and computers." She chuckled softly. "I bet there are lots of people on your ship who think we're really aliens. Do they think we walk like Lurch and talk in metallic, monotone voices?". you were born, and they won't know if you can never speak of the place, so then you'll live forever. And. Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too.. because they've lost a job, or just because. Yet with discreet nods and gestures, the workers continue to. Jean raised her hands in an imploring gesture. "Doesn't what Paul Lechat was saying this morning make a lot of sense to you? Isn't it the only way? Well, he's going to need help to do it. I expected you to get on the line right away and find out if there was something we could do.. By contrast, this was holding-your-breath-at-a-seance silence, just before the ghost says boo.. again, executing as fast a

double take as ever did Asta the dog and his master, the detective Nick Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon. What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand. "That's the current story," Leilani said, "and we're sticking to it. Strange lights in the sky, pale green. Bernard stared at him in open disbelief. "You're not saying she'd simply back down? That's crazy!" his boot. "Remainder of detail, by the left. . . march!" Clump, clump, clump, clump.... "What about Veronica?" she whispered. She took a sip. It was smooth, warm, and mellowing. "That's right." Bernard was surprised and felt a little flattered. "I help look after the main drive systems." As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure..
