

## THE MEMOIRS OF VICTOR HUGO

What I think is you're afraid to stop laughing-".Fallows couldn't quite swallow the words that were being put in his mouth. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. But of course that's just an opinion."..Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms..For longer than she could remember, Micky hadn't allowed herself to be emotionally affected by anyone."You think pretty smart."..On a few occasions, when Sinsemilla had been in one of these playacting moods, Leilani had played."We must have faith/" the preacher roared, his eyes wide with fervor..click-and-squeak of her leg brace faded until it could have been mistaken for the language of industrious..Walters grunted, scanned quickly over the displays, and called the log for the last four hours onto an empty screen. "Looks like we're in for another strip down on that goddamn pump," he murmured without turning his head. "Looks like it," Fallows agreed with a sigh.. "Oh, Christ Warily, Colman brought a hand up to his brow. "Okay. Look, as soon as I can-" Footsteps approaching at the double interrupted and made him look around. It was Sergeant Armley, from the Orderly Room..Slam the door. Throw shut the locks, the bars, the bolts. Before the girl could say more, Micky turned..She continued on her rounds..Sterm shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve.".. "You have the corroborating evidence?".. "Well," he lied, "I'm not hiding anything under this one except a yellowed undershirt I should've thrown." "Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning.. "When did it stop?or did it ever?" Geneva asked. Her softly spoken question reverberated hollowly..operation like this in the Utah boondocks as easily as in Manhattan?although not with a mere..A hand descended on his arm and slid upward to tease the back of his neck. He turned round to find that Kath had come back. "You're starting a bachelors' party here," she said. "I have to break that up before the idea catches on."..Racing away into the night, trying to outrun the screams and the guilt that they drill into him, the boy."No, really.".. "I know ladybugs," Noah said. "They all love the night."..werewolves in the misery of the moon could not have produced more chilling cries than those that caused..strictly followed in all life-and-death matters. Because he had committed himself to healing Leilani one..Geneva smiled. "If there was an altercation, dear, I'm sure you started it."..Stormbel relayed the order, and the huge bulk of the Battle Module began sliding from between the Mayflower II's ramscoop support pillars as its auxiliary maneuvering engines fired. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. The lucky ones-the ones who were wearing suits-could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded..astonishingly clever tricks. When I saw what potential dogs possess, how smart they can be, I wondered..While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it

to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company..Bernard sat back and drew a long breath. He was just about to say something when Jeeves interrupted to announce an incoming call on the Chironian net. It was Kath, calling from her place in Franklin. "I've heard from Casey," she said when Bernard accepted. "He's collected his package with Adam, and they're on their way home with it. I just thought you'd like to know."..She goes..cloud of dust and a powder of dead grass pulverized by a summer of hammering sun..The darkness of the woods..Aunt Gen used a paper napkin to blot her brow. "I mean . . . apart from holding people's walls up for them. That can't be much of a life."..The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic' bundles the size of sleeping bags.."Thingy schemin' up a scheme to get his Leilani mouse, lickin' his snaky lips. Thingy, him be dreamin'.woman she'd encountered earlier would not only accept such a story but might as easily be convinced.mention of her brother, but now they focused. Her gaze rose from her deformed hand to smiling Geneva..He turned right and, within another block and a half, arrived at a tavern. Here he might not be able to..That didn't explain anything. Jay couldn't see it either. "Yes, it would be-nice if everyone in the world were reasonable and rational about everything all the time. But they can't be, can they? Chironians have the same mix of genes as everyone else. There can't be anything radically different."..An alligator of tread strips away from one wheel and lashes across the pavement, snapping like a..This isn't the ideal ride, but Curtis isn't likely to luck into a cushy berth on another automobile transport..are being held. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible."..but fear for her one good hand caused her to choose the nether end..The murmurs from across the street rose suddenly to catcalls and jeers, accompanied by waving fists and the brandishing of sticks that appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly..on the same guiding principle: Do the opposite of what Sinsemilla would do, and there is a better chance..inseparably twined with his. And if not those same two..two small wounds.."The EAP is committed to a dogma of conquest," he said. "They understand no language apart from force. You cannot hope to deal with them by any other means."..she held me back." A ghost drifted along the corridors of the girl's memory, a small spirit with Tinkertoy..like a pack of miniature dachshunds whose tails have been trod upon in rapid succession..whenever he was admitted. Bret Hanion, the sergeant in charge of Second Platoon and a long-standing buddy of Colman, was sitting on the other side of Sirocco with Stanislaw, Third Platoon's laser gunner, and a couple of civilian girls; a signals specialist called Anita, attached to Brigade H.Q. was snuggling close to Colman ~with her arm draped loosely through his..worrisome air of danger and the next moment thick with a terrifying sense of peril. You're not so cool that..then feels unseen masses of road-life paraphernalia beginning slowly to slide toward him, he jams the.."We're still the some people," Jay said from the end of the sofa, looking at his mother. "That's not going to change. If you're going to act dumb, you can do that anywhere." To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself..quick-thinking enough to close his eyes and his mouth before making a solid but graceless impact.."You shouldn't make up stuff like that about your own mother."..dish for the dog; he will simply refill it with juice as often as the pooch requires.."I've got a friend whose mother works most of her time there. Her name's Kathy..To Fallows, Merrick always seemed to have been designed along the lines of a medieval Gothic cathedral. His long, narrow frame gave the same feeling of austere perpendicularity as aloof columns of gaunt, gray stone, and his sloping shoulders, downturned facial lines, diagonal eyebrows, and receding hairline angling upward in the middle to accentuate his pointed head, formed a 'composition of arches soaring piously toward the heavens and away from the mundane world of mortal affairs. And like a petrified frontage staring down through expressionless windows as it screened the sanctum within, his face seemed to form part of a shell interposed to keep outsiders at a respectful distance from whoever dwelt inside. Sometimes Fallows wondered if there really was anybody inside or if perhaps over the years the shell had assumed an autonomous existence and continued to function while whoever had once been in there had withered and died without anyone's noticing..toilets strikes him as hilarious, and the combined flow demand causes plumbing to rattle in the walls..And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an

organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source..She's still headed in the dead-wrong direction, but Curtis races after Old Yeller because they can't turn.much of the meager landscaping drooped wearily under the scorching sun and the rest appeared to be.too, and lowers the barrier, which is well oiled and rattle-free. He could have stepped onto the bumper."Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next.."I've served over seven years, which puts me on a quarter-to-quarter renewal option. Therefore I owe you a maximum of three months. Okay, I'm giving it. But I also have more than three months of accumulated leave from the voyage, which I'm commencing right now. You'll have that confirmed in writing within five minutes." He stood up and walked to the door. "And you can tell Accounting not to worry too much about the back pay," he said, looking back over his shoulder. "I won't be needing it." On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago..the boy treats them with equal courtesy, although he knows that they may be either ministers or.He stopped for a moment to stare out through the window while he collected his thoughts. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted.
