"The people who are being held in the rooms along corridor Eight-E," the shorter of the two sergeants whispered with a hint of an Irish brogue. "You take their food in?" The steward gulped and nodded vigorously. "When is the evening meal due?" .He crosses the threshold and eases the door shut behind him..Being among people is helpful, too. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out."."To whom do I have to justify anything? Those rules belong to Earth. I make my own."."Maybe it was an antidote to all that crap the Eagles sang."..not merely a passing madness or an enduring insanity, but also passion. "Do you really think they might be able to pull something off?".Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm..Now she knew why Earth seemed so far away. And she knew too what her mind in its wisdom had been cloaking and shielding from her. It was fear.. "Was your father like that too?".A little moonlight nevertheless would be welcome. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all.. "That's part of it," Pernak replied, nodding. "The satisfaction that their culture conditions them to feel is another part, but you're getting the general idea."..The young, sophisticated wife that Howard Kalens had taken with him to Luna to join the Mayflower H was now in her early forties, but her face had acquired character and maturity along with the womanly look that had evolved from girlish prettiness, and her body had filled out to a voluptuousness that had lost none of its femininity. She was not exactly beautiful in the transient, fashion-model sense of the word; but the firm, determined lines of her chin and well-formed mouth, together with the calm, calculating eyes that studied the world from a distance, signaled a more basic sensuality' which time would never erase. She stared at the right for the weather. "As long as you don't make it your business to go bothering people, you'll be okay," Nanook pointed out. "So it never affects most people. And when it happens . . . it happens." "What an impressive name," Geneva said. "Like a Supreme Court justice or a senator, or someone. And then the three Special Duty troopers leaving the Bowery stopped to see what was going on, giving Padawski the excuse that he needed. "Let's get out of here," he said. The trio swaggered toward the door and Hanlon moved in, then stepped aside. Padawski stopped in the doorway and half turned to throw a malevolent look back at Colman. "Some other time. Next time you won't be so lucky." They left. Outside, the three SD troopers turned away and moved slowly off. Besides, he's got Old Yeller to think about. Good pup. Just then Jerry Pernak came around a corner accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bernard praised their quality and promised to tell his grandson what the Terran had said. "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately." "Well what do you know--I'm on the loose tonight," Paula said, giving Hanlon a cosy look. "What's the problem?" Bernard, who had finished talking to Jeeves for the time being, came over to them. Marie followed close behind. "You do. Don't you like it when your team wins in the Bowl? Why do you work hard at school? You like science, sure, but isn't a lot of it proving to everybody that you're smarter than all the assholes who are dumber than you, and getting a kick out of it? Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians. "Well, I think there's something to be scared about," Paula said. "Suppose they turn out to be really mean and don't want to mess around with talking at all. Encountering STARSHIP COMMAND CENTER, CAPTAIN CURTIS HAMMOND. "By my authority." Matthew Stern rose from his seat and came round onto the floor to face the assembly defiantly. "This prattling has continued for too long. I have no eloquent speeches to make. Enough time has been wasted on such futilities already. You will all proceed now, under escort, to quarters that have been allocated and remain there until further notice. We have business to attend to." He nodded at Stormbel, who motioned at the guards. "I would like Admiral Slessor's to remain behind to discuss matters concerning the continued well-being of the ship." Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on. Movement gives him confidence, and confidence is essential to maintaining a successful disguise. Inside, a large hail of counters and shelves displayed all manner of products from electronic devices and scientific instruments at one end to rainwear and sports equipment at the other. As they entered, a self-propelled cart detached itself from a line near the door and trundled along a few feet behind them, at the same time announcing, "Welcome to Mandel Bay Merchandise. Did you ever think of laying out your own garden and tending it manually? It's good open-air exercise, very relaxing, and ideal for turning those things over in your mind that you've been meaning to think about... as well as the soil, he-he! Maybe she was Cindy Sue or Barbara way back in the Jurassic period, but she's on a forty-eight, that right?" Waiters asked. "Uh-huh." "Any plans?" however, if she hadn't ascended in the sparkling rapture of a starship's levitation beam, Preston would. "I'm not sure it's enough," he worries, jamming his bankroll into his pocket again. "I need two bottles of Tush." Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted..that his heart was too compressed to contain the more expansive emotions..Although everybody had been expecting the announcement, a tension had been building as the room waited for the words that would confirm the expectations. Now that the words had been said, the tension released itself in a ripple of murmurs accompanied by the rustle of papers, and the creaks of chain as bodies unfolded into easier postures..A short silence fell, and the deadlock persisted. Then Marcia Quarrey turned from the window, where she had been staring down over the Columbia District. "I thought you said earlier that there was a provision for ensuring the continuity of extraordinary powers where security considerations require it," she said, frowning..twelve steps, he checked on the SUV, and always it drifted slowly along in his wake, pacing him..The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes.
