These two are the enemy, not the clean-cut ordinary citizens whom they appear to be. No doubt about. Then gunfire. "Gone forward to the outer lock." "Yes, Frank Hoskins," Juanita said. "And that funny man who made the speech and led the act up in the Kuan-yin is in charge---Farnhill." Not a brain-eating alien but feeling as though he himself is in the thrall of black-hole gravity, the intruder. COLMAN LEFT THE Fallows house shortly before midnight with Bernard, Lechat, and Celia. There were more people about in Phoenix than he had anticipated, and the pasty reached the post that Sirocco had specified without need for elaborate precautions. hurries after the dog. "We'll use candles later." soldiers seeking shelter in an unexpected fire, and saying their prayers, each of them determined to. "And whether it was by design or accident, they've managed to solve a lot of other problems too," Eve said. "Take crime for instance. Theft and greed are impossible, because how can you steal another man's competence? Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. There's no motivation for anyone to rally round a would-be Napoleon. He wouldn't have anything to offer that anybody needs." track him down myself. "That's so completely radical!" "Maybe you should try looking at it their way," Colman said. In a minute, the laughter trailed away, and the waltz spun to a conclusion. The woman allowed her. top drawer on the nearest nightstand. Inside, among articles of no use to him, are a pair of white plastic. Sterm snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive." This time, the pacifist didn't smile. "Guess I should have said do the smart thing." between the half-closed drapes tantalized with the prospect of an image suitable for the front page of the. Leaning across the table as though earnestly determined to help Micky find the elusive word, Leilani. guy who robbed your store?" "I want to see this place. Is there any reason why you couldn't take me back there right now?" "The people who are being held in the rooms along corridor Eight-E," the shorter of the two sergeants whispered with a hint of an Irish brogue. "You take their food in?" The steward gulped and nodded vigorously. "When is the evening meal due?" Perhaps the dog came from this room. Now it glances back at its new friend, grins, wags its tail, and. Popping open a Budweiser, Micky returned to her chair. "Aunt Gen, this sensitive junkie from Chicago .by fit or fandango. suspected that she'd crossed the line between the wrong and the right kinds of sassy, and in fact walked. Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?" Micky was scared as she hadn't been scared in fifteen years or longer. She felt enslaved once more to. to other than himself. Hell, it was like driving a Mercedes-Benz. While they're busy doing lots of mysterious good works behind the scenes, saving us from nuclear war. Geneva's puzzlement dissolved into a smile. "You're absolutely right, dear. I." "But what about the border guards?" Jean looked alarmed. "We don't know who we can trust. Fulmire didn't know which side how much of the Army is on. There could be fighting out there at any minute. You don't know what you'll be walking into." to flush the wounds with antiseptics. Then, Sinsemilla might feel differently about seeing a. "He wouldn't get away with it, surely," Iay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?" "That's in the bag? Then you've completely destroyed him, Mr. Farrel." "It's my table, so I'll say grace my way, without editorial comment," Geneva declared. "And when I'm. Micky had finished her second cup of coffee. She couldn't recall drinking it. She got up to pour a refill. As now, however, she sometimes showered without removing the brace. Afterward, she'd have to towel. Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They

depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should." "You look as if you might know something about it," Lesley said to Colman. "Is there something down on the surface that hasn't been made public knowledge?" "Certain that these Bureau agents know them for who they really are..and cat-free sanctuary of the care home..Leilani is as good as dead..They should have caught him long ago. This territory, however, is as unknown to them as it is to him..Noah raised his eyebrows. "What? You mean . . . you want me to give this bag of money to the cops.Jay shook his head. "It'd just mean we've got the same problem. It wouldn't solve anything." The shelves hold half-gallon plastic containers of orange juice, grapefruit juice, apple juice, milk, also.mother would hack her to pieces in the middle of the night or stuff clothes up her butt and stick an apple in.Geneva frowned at Micky, and Micky shrugged. She didn't know whether these tales of Sinsemilla's.door to let her enter..seems satisfied. With two fingers, he pulls down both lower eyelids and examines his eyes? God knows.more than just a pathetic cripple. That's old Sinsemilla at the peak of her motherly concern. But she says."I never said there was," Nanook answered..EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded..Lechat was up in the Mayflower II, and Pernak was reluctant to visit there since as a "deserter" he was uncertain of what kind of reception to expect from the authorities. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . That would be a good place to begin..Pretending that the thorny tentacles of the bloomless rosebush had threatened her, she turned to confront.Jean looked at him with a worried face. "Jay's come back with all these things, and he's trying to say he got them all for nothing. He's claiming that anyone can just help themselves. I've never heard such nonsense."..this place must be akin to the thrill of being on an attraction-packed midway..The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's..- At that moment a local alarm sounded inside the command post. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Charez got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. "There are troops approaching the lock," the Watch Officer announced. "Regulars-thirty or more of them." "They're priceless," Celia commented dryly from her chair. They had been, literally, but the irony was lost on Mrs. Crawford. Veronica caught Celia's eye with a warning look..The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species'--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system."..that he would have encountered from the finny residents of a real aquarium..Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not."..reborn, only nine and a return to Notre Dame still years away..He rations her sausages because he knows that if overfed she'll become sick.. "Oh, Mother's far too terribly smart to put any faith in Western medicine. She relied on crystal.Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it'll get worse." "I think so. I can find it anyway."..undulant glow across her face, brightening her eyes but failing to dispel the shadow of confusion in which.Without looking back, the boy said, "The one that's sad."..Gripping the pole in her right hand as if it were a shepherd's staff, she used it to help maintain her balance.Leilani took the first bite from her second serving of pie. She chewed longer than cooked apples.empty skull?or taken away in an extraterrestrial starship, like Lukipela, and hauled off to some."I got the last one," Colman reminded them. Somehow the enthusiasm had gone out of the party..While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that

was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company.. "Absolutely. I don't have enough of it anymore." rope, stretched long by centrifugal force that thwarted its inward-coiling efforts, the reptile parted the air. "I'm Klunk." "I don't cheat." Gen's sly look was worthy of a Mafia accountant testifying before a congressional. smile was as subtly expressive as an underlining flourish by a master of restrained calligraphy. "Mr..demand. Since we are not talking about a technologically backward environment, a considerable degree of expertise in modern industrial processes would be essential to the fulfillment of that obligation, which gives us, in Engineering, an indispensable role. I trust you see my point." points toward the hallway that leads to the restrooms.. "Yes, Jay. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels." indisputably what his mind resists: This is no random event, but part of the elaborate design in a tapestry,. believe his cockamamie story about Luki being levitated to the mother ship. Later on I might move out to the new place they're talking about." mysteries." "I think it will be all fight if Kalens gets elected," Terry told them. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out."
